

I-Suite Patch 2007-1 Release Notes

Date: May 9, 2007
Release: I-Suite Patch 2007-1

This is a critical update to help ensure contract resources are paid correctly.

Description: The purpose of this patch is to change the OF-286 invoice, so it automatically determines when a guarantee is paid. It is paid when the total dollar amount of time postings for a given day is less than the guaranteed amount for that resource. This is the same functionality that existed for OF-286 invoices in the 2006 version of I-Suite.

Caution: If a contracted resource with a guarantee has postings on the same day to different account codes or different incidents, a separate OF-286 invoice is created for each account code or incident. When the posted time on both invoices is less than the guarantee, the guarantee will be applied on both invoices. The end result is a potential overpayment.

Things to know prior to installing I-Suite Patch 2007-1

- It is recommended that this patch be installed on all computers running I-Suite 7.01.01. It is **required** on computers generating OF-286 invoices.
- This patch can update a server or client installation of I-Suite.
- System Administrative privileges are NOT required to properly install this patch.
- This patch can be installed mid-incident.
- Close all open OF-286 invoices on the local computer before installing this patch.
- The installation of I-Suite Patch 2007-1 will overwrite the file OF286.rpt.
- This patch is only required for I-Suite version 7.01.01.
- A database back-up is not required prior to installing this update.
